Hyperox® - Disposal of Empty Containers

Dear valued customer,

For disposal of empty containers of Hyperox® (5L & 20L), please find below our guidance.

General note: Handling and rinsing of any packaging should be performed following the Safety Data Sheet and any risk management measures stipulated in your site-specific risk assessment.

Empty and drained containers should be completely drained after use and labels removed, before thorough rinsing with water, along with the caps.
Once dried, they can be disposed of through normal waste channels, e.g. recycling.

Hyperox® undergoes decomposition over time to non-persistent breakdown products; however, residual product and rinsewater should nevertheless be managed in accordance with local regulatory and site-specific waste handling requirements.

Containers must not be reused for any other purpose.

Andrew Jenkins
Head of Regulatory Affairs EMEA
