Operator Protection

The (COSHH) Control of Substances Hazardous to Health Regulations may apply to the use of this product at work. Engineering control of operator exposure must be used where reasonably practicable in addition to the specified personal protective equipment when handling the concentrate. However, engineering controls may replace personal protective equipment if a COSHH assessment shows that they provide an equal or higher standard of protection. Where the personal protective equipment specified on the Silwet-L77 label is different to that specified on any partner product label(s), the highest level of protective equipment must be worn. (Ireland) In the event of emergency, call the National Poisons Information Centre, Beaumont Hospital at 01 809 2166 or 01 837 9964

Environmental Protection

Do not contaminate water with the product or its container (Do not clean application equipment near surface water/Avoid contamination via drains from farmyards and roads).

Storage and Disposal

Always store this product in its original container in a safe place.
Triple rinse container, empty washing into the spray tank and dispose of the empty container safely and in line with guidance such as the Good Practice Guide (Ireland) or the Code of Practice for Using Plant Protection Products (UK).
The container must not be re-used for any purpose.

MIXING INSTRUCTIONS

Half-fill the spray tank with water and commence agitation. Add the required quantity of SILWET L-77 then add the recommended quantity of pesticide. Continue agitation while topping up the tank and during spraying.

RATES OF USE

SILWET L-77 is used at a rate of 0.05% of the final spray solution for foliar application and 0.1% for soil application. For water volumes above 400 litres/ha use 0.025% (25 ml per 100 L water).

DIRECTIONS FOR USE

SILWET L-77 is authorised for use with all approved fungicides applied to cereals.

SILWET L-77 may be used at a maximum concentration of 0.15% spray solution on the following crops, up to the growth stages specified, with all approved pesticides applied up to their full approved rate.

Crop	Growth Stages before which SILWET L-77 may be used with approved pesticides.
Cereals	up to and including GS 52 (1/4 inflorescence)
Oilseed rape	up to and including 10% potential pods
Broad bean, dwarf French bean, field bean, runner bean	up to and including first pod set
Combining pea and vining pea	up to and including flat pod (non edible pods only)
Edible podded pea	up to and including pod set
Linseed	up to and including 10% capsule formed
Forage maize	up to and including tip of tassle visible
Sugar beet	up to and including 6 fully expanded leaves
Potato	up to and including tuber initiation
Brusssels sprout	up to and including lateral buds begin to develop
Cauliflower	up to and including cauliflower heads begin to form: width of growing tip up to 1cm^2
Lettuce	Varieties forming heads: up to and including heads begin to form
	Varieties not forming heads: up to and including leaf rosette has reached 30% of the diameter typical for the variety
Apple and pear	up to and including fruit 5-10mm

In addition to the above conditions SILWET L-77 is authorised for use with all approved pesticides on all edible crops provided tha the statutory conditions of use for the pesticides are followed and that the pesticides is not used at more than 50% of the maximum approved rate for that application.

SILWET L-77 is also authorised for use with all approved pesticides on all non edible crops, all non edible crops (stubble), all edible crops (stubble) and for non crop production provided that the statutory conditions of use for the pesticide are followed.

SILWET L-77 may also be used to reduce drift of sprays where this is a concern.

SILWET L-77 may also be used in tank-mixture with liquid fertilizers and trace elements to improve coverage and uptake.

Do not use in mixes with other adjuvants or if conditions are not recommended for the partner pesticide or trace element.

For Specific Recommendations contact De Sangosse Ltd. or its appointed Distributors.
