Product data sheet

Addit

Rapeseed triglycerides | Emulsifiable vegetable oil

- Spreading and wetting agent
- Can be used in combination with Mycotal and entomopathogenic nematodes

Use for

Improves the effect of Mycotal and entomopathogenic nematodes.

Crops

Do not use on kalanchoe plants.

How it works

Mode of action

Addit improves the spread of plant protection products onto the plant surface.

When added to Mycotal, this will increase the chance that spores of the entomopathogenic fungus come in contact with the target pest.

Addit also improves the spreading of entomopathogenic nematodes in foliar applications.

Product specifications

Pack size

1 and 2.5 litre container.

Formulation

Emulsifiable vegetable oil.

Content

Rapeseed triglycerides.

Directions for use

Preparation

- Prepare the spray solution of the plant protection product according to the user instructions
- Shake the Addit container well
- Add the correct amount of Addit to the spray solution
- Mix thoroughly

Application

Use the plant protection product according to the user instruction of that product.

Watch the Application video of Addit

Dosage

125–250 ml per 100 litres of water (0.125-0.25%), depending on local registration.

Compatibility

- Do not mix Addit with other additives
- Addit must not be used with herbicides

Product handling

Storage time after receipt

- See package for expiry date
- Storage time will decrease once package has been opened

Storage temperature

Preferably above 10ºC/50ºF. If Addit has been stored below 10ºC allow the product to reach room temperature and shake until precipitation disappears.

Storage conditions

- Store in a cool and dark place
- Avoid direct sunlight

Safety Data

See product label and SDS.

Precautions

Before using Addit in combination with plant protection products in crops that might be sensitive to phytotoxicity, test in a small area before proceding with application.
