(UK) ATTRACKER Trick Thrips

Mode of action
Attracker contains a solution of several sugars (fructose, glucose, saccharose). The product lures insects - particularly thrips - from their sheltered places in the crop. Adding Attracker to pesticides, will improve the exposure of the pests to the chemical spray, resulting in significantly better control.

Application and dosage
Always read the label carefully.

Dosage
- Outdoor crops 2 - 4 liters per hectare
- Indoor crops 0.1 - 0.2% solution

Preparation of spray solution
- Prepare the spray solution of the pesticide to which Attracker will be added according to the label recommendations
- Shake the plastic container with Attracker thoroughly before use
- Add the right dosage of Attracker to the spray solution
- Mix thoroughly

Storage
- In original packaging at a temperature of 2 - 30°C
- In the dark

Package
Empty container completely and dispose of responsibly.

Remarks
Koppert B.V. is not liable for any direct of indirect loss whatsoever resulting from improper use of the product or non-compliance with the directions for use.
