Agitation/Aeration

Agitation/Aeration Bucket

Dramm's Agitation/ Aeration Bucket provides a thorough mixing of any solution. Perfect for use with an injector, the Agitation/ Aeration Bucket can keep water soluble fertilizers, fungicides, insecticides and PGRs in suspension.

With a flip of a switch, agitation turns to aeration. Air is introduced into the passing stream, keeping dissolved oxygen at saturation levels. Use this feature when agitating nematodes or other organisms requiring oxygen.

Specifications

5 gallon Capacity	PART# AAB120V	PART# AAB12V
0.7 gpm Flow Rate	120V AC, 0.33 amp	12V DC
Eductor for Increased Flow		
Aeration or Agitation
