Ecoplug Max®

MAPP Number 17581

Contents 100x283 mg plugs.
Each plug contains 204 mg glyphosate.

H - Herbicide

PROTECT FROM FROST
Store in a cool dry place.

Imported

Ecoplug Max®

MAPP Number 17581

A tree stump technique releasing glyphosate for the treatment of stumps to minimise root and stump sprouting

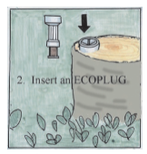

This product contains water soluble granules containing 720g/kg glyphosate
The (COSHH) Control of Substances Hazardous to Health Regulations may apply to the use of this product atwork

Recommendation Table for Cut Stumps

Tree Species	STUMP diameter in cm	Number of Ecoplugs
Group 1: Alder. Aspen, Beech, Birch, Elm, Lime, Maple, (Sycamore), Mountain Ash, Willow	3-6 cm	1
	6-10 cm	2
	10-14 cm	3
	14-18 cm	4
	>20 cm	6-8 cm between plugs
	Each buttress root	1
Group 2: Ash, Cherry, Bird Cherry, Oak	3-6 cm	1
	6-10 cm	2
	10-14 cm	3
	14-18 cm	4
	>20 cm	5-6 cm between plugs
	Each buttress root	2
Group 3: Poplar, Rhododendron, Elder, Tree of Heaven	3-6 cm	1
	6-10 cm	2
	10-14 cm	3
	14-18 cm	4
	>20 cm	3-4 cm between plugs
	Each buttress root	2

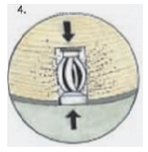

Drill a hole close to the bark, from above or from the side, 30-35 mm deep, using a 13mm drill.

Place an ECOPLUG® in the hole with the thicker end outwards.

Drive the ECOPLUG® into the hole with a hammer.

Drive the ECOPLUG® completely into the hole so it cracks open and the glyphosate dissolves into the root system.

COMPANY ADVISORY INFORMATION

CAUTION: THIS PACK MUST NOT BE SPLIT FOR RESALE

`No person shall sell, supply or otherwise market to the end-user an approved product other than in the container supplied for that purpose by the holder of the approval of that pesticide, and under a label approved by Ministers.´

Ecoplug Max
Contains glyphosate ammonium salt

Keep only in original container.
Dispose of contents/container in accordance with local regulation.

IMPORTANT INFORMATION
FOR PROFESSIONAL USE ONLY AS AN INDUSTIAL/FORESTRY/ AMENITY/AQUATIC HERBICIDE

Crops/situations:
Forest (stump); Amenity vegetation (stump); Land immediately adjacent to aquatic area (stump); Open waters (stump); Enclosed waters (stumps)

Maximum individual dose: } See Recommendation table
Maximum number of treatments: }

READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE. FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS.

DO NOT OPEN THE ECOPLUGS
KEEP PLUGS STORED IN THE OUTER PACKAGING AT ALL TIMES UNTIL USED
WHEN USING DO NOT EAT OR DRINK OR SMOKE.
WASH DUST/GRANULE FROM skin or eyes immediately.
WASH HANDS AND EXPOSED SKIN before eating and drinking and after work.

Operator protection

SAFETY PRECAUTIONS

Environmental protection
Do not contaminate water with the product or its container (Avoid contamination via drains from farmyards and roads)
Users must consult the appropriate water regulatory body (Environment Agency/Scottish Environment Protection Agency) before using the product in or near water. Do not use more than 10,500 plugs/ha

Storage and disposal
KEEP AWAY FROM FOOD, DRINK AND ANIMAL FEEDINGSTUFFS.
KEEP OUT OF REACH OF CHILDREN.
KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place.

Medical advice
For 24-hour emergency information contact Bayer CropScience Ltd.

DIRECTIONS FOR USE

IMPORTANT: This information is approved as part of the Product Label.
All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

Restrictions
Do not use for any other purpose than treatment of freshly cut tree stumps

Weeds controlled
Stumps of broad leaved trees as listed under Recommendation Tables for Cut Stumps.

Stump Treatment
Drill a hole(s) 30-35mm deep using a 13mm drill bit (or use Ecoplug Max's adapted drill bit) either from above or into the side of the stump. Check the Recommendation Table and space the holes not more than 6-8cm apart around the entire circumference of the stump. From above, drill as close to the bark as possible because the tree's transport system is directly adjacent to the bark. Insert Ecoplug Max plugs into each hole with the thicker end protruding outwards. Using a hammer, drive the Ecoplug Max plug in completely so that its head seals the drilled hole causing the plug to release the herbicide. The total number of plugs used will depend on the tree specie and the diameter of the stump as indicated in the Recommendation Table.
If there are buttress roots apply an Ecoplug Max plug to each of them. For best results, stump treatment should be done not more than two days after felling.

Ecoplug Max may be used in any weather at any time of the year.

Information on symptoms, timing and re-treatment
Without Ecoplug Max, sprouting from cut stumps occurs in the spring or early summer following felling in the dormant period (autumn/winter). This may be >6 months after felling. In the case of spring or summer felling sprouting occurs 3-12 weeks after felling. Symptoms of successful treatment with Ecoplug Max are the absence of sprouting in the following spring or summer whether applied in the dormant or active period of tree growth. In rare cases sprouting may only be delayed or reduced resulting in stunted and malformed chlorotic growth of sprouts. In such cases complete kill can be obtained by inserting an Ecoplug Max plug just below the surviving sprout.
