TDS-278-1

Technical Data Sheet

Product: Epiphyas postvittana

Code: PH-328-1RR

Product Function: Monitoring

Description: This product is a pheromone lure for the light brown apple moth

Latin Name: *Epiphyas postvittana*

Active Ingredients: E-11-tetradecenyl acetate, E,E-9,11-Tetradecadienyl acetate

Dispenser: Rubber septa

Longevity: 4 - 6 weeks

Packaging: Airtight metalized sachet

Trap Application:
Remove the lure from the packaging and place in the centre of the sticky insert inside the Delta trap. Place delta traps at the highest point of the plant using supporting posts, approximately 1 meter high or higher if the crop is higher than 1 meter.

Trap Density:
Place one trap every two hectares for large scale fields of homogenous lands. Place two traps per hectare for small holdings and in fields of uneven topography.

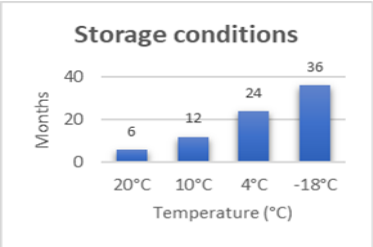

Suitable Traps:
The most suitable trap for this insect is the Delta trap.

When to Use:
Use before the emergence of the first generation and until the end of the season.

Replacement:
Replace every 4 - 6 weeks or as recommended by the local agricultural authority. Dispose of pheromone packaging away from the monitoring area.

Store in a cool, dry place out of direct sunlight.

- When stored in a cold room of 10-20°C, this product will last 6 months.
- When stored in a refrigerator at 4-9°C, this product will last 12 months.
- When stored in a freezer at -18°C, this product will remain effective for 24+ months.

Precautions

- Handle carefully, avoid extensive contact by hand and wear gloves when handling.
- Do not eat or drink while handling this product.
