Product data sheet

Fruit Fly Attractant

Mixture of sugars, vinegar and soap | Lure for spotted wing drosophila

- Attractant for *Drosophila suzukii*
- For use with Drososan trap

Use for

Pests

Spotted wing drosophila (*Drosophila suzukii*).

Crops

Various fruit crops.

How it works

Mode of action

Flies are attracted by the luring substance and enter the trap. Once inside, they cannot escape and drown in the luring substance.

Product specifications

Presentation

5 litre container.

Directions for use

Application

- Fruit Fly Attractant is ready-to use
- Fill the Drososan trap with 200 ml of the luring substance
- Refill when the luring substance has evaporated or is saturated with flies
