Future planting

Gallup Home & Garden has no long-lasting effects in soil after application. Cultivations and planting can be conducted 7 days after application or if the weather has been cool, after the weed leaves have become yellowed or have died back.

Care of gardens

This product should only be used for the destruction of unwanted vegetation. DO NOT use Gallup Home & Garden on lawns or allow the spray solution to come in contact with any desirable plant species.

Care of equipment

Wash equipment thoroughly after use with water to remove traces of Gallup Home & Garden.

Traces of Gallup Home & Garden left in the equipment may seriously damage or destroy plants sprayed with the same equipment at a later date.

PROTECT FROM FROST.

REFERENCE GUIDE

- **Systemic and non-selective weedkiller for control of most annual and deep rooted perennial weeds**
- **No need to remove children or pets from treated area once spray has dried**
- **Easy-to-follow application rate**

Gallup® Home & Garden

Contains 360 g/l glyphosate in a soluble concentrate

Key Benefits

- Kills most weeds and grasses with a single application
- Gallup Home & Garden is inactivated on contact with the soil and is broken down by soil organisms to leave no lasting residues
- Kills weeds and roots of unwanted vegetation
- Weeds may show first effects from a few days up to 4 weeks after depending on the weather and type of weed
- Children and Pets need not be excluded from treated area once the spray has dried

Rainfall within 6 hours of application may reduce effectiveness and require re-treatment.

Take extreme care to avoid spray drift. DO NOT SPRAY in windy weather or near to desirable species or plants as drift can cause severe plant injury or destruction.

When to use

Gallup Home & Garden contains glyphosate for effective control of annual and deep-rooted perennial garden weeds, including grasses, docks, nettles, willowherb, dandelion, bindweed and many more.

- Apply when weeds are actively growing and have adequate leaf area to absorb the spray
- Spray nettles and ground elder when new leaves have fully unfolded in late spring
- Do not spray in windy conditions as drift can damage or kill valued plants
- Do not walk into treated areas until the spray has dried on the leaves, to avoid transfer to lawns and other wanted vegetation
- Treat established perennial weeds at the start of flowering for best effect
- Leave treated weeds for at least 7 days before cultivating
- Gallup Home & Garden kills most weeds with a single application. Some tough weeds, e.g. ground elder, may need a repeat treatment after 3-4 weeks if regrowth appears
- If re-treatment is required repeat only once per season

How to use

Apply with a knapsack sprayer as a MEDIUM-COARSE spray.

Spray to just cover the weeds without run-off from the leaves. Ensure the sprayer is only used for herbicide application.

Where to use

For use on unwanted vegetation.
DO NOT use on lawns.

Spot treatment

Where the use of Gallup Home & Garden is for spot treatment on individual weeds the following guidelines apply:

- On non-porous hard surfaces such as concrete or paved areas, Gallup Home & Garden must only be applied directly to the weed surface. Blanket application is not allowed
- All hand-held sprayers should be calibrated to enable accurate application rate
- Sprayer nozzles can be adjusted to give a droplet size from medium to coarse range (BCPC)
- The leaves should have an even coverage of drops after spraying but not be saturated or have any run-off

Mixing

Applicator	Gallup Home & Garden to be added	Amount of water to be added	Area treated
Knapsack Sprayer	24 ml	1 litre	40 square metres (5m x 8m)

Knapsack application

Add 24mls of Gallup Home & Garden to 1 litre of water to treat up to 40 square metres (5m x 8m). Shake/agitate the mixture thoroughly before use. Use immediately after mixing.

DO NOT MIX, APPLY OR STORE GALLUP HOME & GARDEN IN GALVANISED OR UNLINED MILD STEEL CONTAINERS OR WATERING CANS.
