Live & let grow!

- ✓ Safe to use on edible plants
- ✓ Strengthens and stimulates growth
- ✓ Treats an area of plants up to 30m²

750ml e

GRAZERS

EFFECTIVE AGAINST DAMAGE FROM

CABBAGE WHITE BUTTERFLIES, CATERPILLARS, APHIDS AND OTHER SAP SUCKERS

Strengthens and stimulates plant growth safely and effectively!

Directions

- Shake well; twist nozzle to fine spray; squeeze trigger firmly.
- Spray vulnerable plants just before or at first signs of damage.
- Seedlings under protection are very tender and prone to scorch from using any spray products. Harden off young plants by bringing outside gradually over a week or more before spraying.
- Spraying weekly whilst at risk is effective against damage and benefits the plant. It is safe to spray more frequently, if for example, damage persists, prolonged heavy rain follows spraying or if plants are watered overhead.

Instructions

- Hold bottle 20cm away from the plant and spray all foliage including underside.
- Spray until droplets start to run off.
- Allow leaf to dry before applying any other product.

Precautions: Keep away from children; in the event of spray contact with eyes wash thoroughly with water. If symptoms persist seek medical advice.

Storage: Will keep for 2 years in cool, dark conditions.

Harvest interval: 1 week (in case of slight risk of taint).

Grazers contains a special food grade calcium chloride solution - 10% CaO and other minor nutrients and a wetting agent in a ready to use solution with water. (Grazers does NOT contain any animal by-products).
