Product Information

Osmocote Exact Tablets
Osmocote Exact Tablets offer you the chance to give very accurate doses of nutrients in a simple fashion. Due to its cone-like shape, the tablet can be pushed down easily into growing medium. The tablets are available in longevities of 5-6 and 8-9 months. As with Osmocote Exact, the longevity can be recognized by the colored granules in the tablets. The tablets are available in 5 gram and 7.5 gram.

Directions for use

For application in existing cultures, tablets should be pushed completely into the growing media. In hanging baskets place the tablets in the growing media in a circle around the plants. When drip irrigation is used, push the tablet in the growing media right under the dripper. After application and watering, the water soluble adhesive dissolves and the tablets fall apart.

Available in the Osmocote Exact Tablet range: 5-6M and 8-9M. Ask your supplier for more information or consult our website.
