

OsmoTop

OsmoTop 2-3M

22-5-10+2MgO+TE

2-3

OsmoTop has been specifically developed for topdress applications in container nursery stock. OsmoTop is ideal for topdressing on containers for quick greening or for fast corrections of deficiency symptoms. Only use on well-rooted, containerized plants.

oxide	
Nitrogen Total (N)	**22%**
Urea nitrogen (Ur-N)	22.0%
Phosphorus Pentoxide (P_2O_5)	**5%**
Potassium Oxide (K_2O)	**10%**
Water soluble (K_2O)	10.0%
Magnesium Oxide (MgO)	**2.0%**
Iron (Fe)	**0.50%**
Manganese (Mn)	**0.50%**
Copper (Cu)	**0.050%**
Chelated by EDTA	0.050%

Advantages

- OsmoTop contains fast and controlled release nitrogen.
- Fine granule size made with Everris granulation technology for even distribution on the containers.
- OsmoTop will stick to the growing media surface.
- OsmoTop is dust free.
- OsmoTop contains extra trace elements for greening effect.

Characteristics

Longevity

2-3 Months

Granule size

1-2.5mm

Directions for use

OsmoTop has been specifically developed for topdress applications in container nursery stock. OsmoTop is ideal for topdressing on containers for quick greening-up or for fast corrections of deficiency symptoms.

Topdressing can be done in case of overhead irrigation or drip irrigation. When drip irrigation is used, the product should be applied directly under the dripper(s). The product can be applied with recommended ICL Specialty Fertilizers topdress applicators. Ask your ICL Specialty Fertilizers advisor for more information.

Store under dry conditions. Partly used or damaged bags should be closed well.

Recommendations

	Containers < 10 litres	Containers > 10 litre

	Containers < 10 litres	Containers > 10 litre
Container Nursery Stock	1-2 g/l	10-20 gram + 1 gram for every extra litre pot content

Do not apply more than 5-6 grams of product on one spot. For larger containers, divide the product equally over the surface. Irrigate well directly after application.

Attention

Only use on well-rooted, containerized plants. Reduce the above mentioned rates for sensitive plant material. Apply the product only by topdressing. In case drip irrigation is used, place the product under the drippers.

This product is not meant for mixing or dibbling in substrates. Topdress products cannot be used with capillary maths or eb / flood irrigation systems. Contact your ICL Specialty Fertilizers advisor for more detailed advice.

Trial first on a small scale before rate, application or other changes in your cultural practices are implemented. As circumstances can differ and as the application of our products is beyond our control, ICL Specialty Fertilizers cannot be made responsible for any negative results.
