

PhytoPrime M

Compound fluid NK fertiliser 2-0-4

FICHA TÉCNICA
Technical Data Sheet

COMPOSITION

Total nitrogen (N) 2.3 % w/w
Total potassium oxide (K₂O) 3.7 % w/w (3.1% K)

OTHER COMPONENTS:

Total organic matter 35.0 – 45.0 % w/w
Organic carbon (C_{org}) 20.3 % w/w
Dry matter.....28.0 % w/w

PHYSICAL-CHEMICAL CHARACTERISTICS

Aspect.....liquid
Color.....brown
pH.....4.5 – 6.5
Density 1.25 ± 0.05 g/cm³

FEATURES AND APPLICATIONS

PhytoPrime M is a Plant Primer, promoting natural resilience within the plant using Neo-Prime Technology and increasing its ability to overcome attack by mite pests.

The formula is exclusive to VEGANIC NATURE.

DOSAGE AND INSTRUCTIONS FOR USE

PhytoPrime M should be used by root application on all crops.

	Root Dose	Frequency
Vegetables	2.5-3 L/ha	Every 7-10 days
Soft Fruit	2.5-3 L/ha	Every 7-10 days
Top Fruit	3-5 L/ha	Every 10-15 days
Ornamentals	2.5-3 L/ha	Every 7-10 days

ADDITIONAL INFORMATION

Packaging: 1 L bottles (12 x 1 L outer), 5 L containers (4 x 5 L outer), 20 L containers, 200 L containers and 1000 L containers.

PROFESSIONAL USE

The technical specifications of the product, such as contents, dosage and mode of use, applications and crops, precautions, storage rules, incompatibilities and manufacturer's notes, are detailed on the label.
