Provanto - SMART BUG KILLER - MAPP 19422

Provanto SMART BUG KILLER is a ready-to-use insecticide for use in the home, garden, greenhouse or conservatory. It can be used on a wide range of crops such as ornamentals, apples and fruiting vegetables such as tomato, peppers, chilli and cucumbers.
Provanto SMART BUG KILLER is a systemic insecticide, for the control of sucking pests such as aphids, leaf hoppers, scale insects and whiteflies. The active ingredient - Flupyradifurone is a new foliar insecticide belonging to the butenolide chemical class. It acts by contact or after ingestion and has systemic properties. It kills pests on contact but also works from inside the plant to control any future pest attack.

FOR USE ONLY AS A HOME GARDEN INSECTICIDE. To avoid risks to human health and the environment, comply with the instructions for use.
Contains METHYLCHLOROISOTHIAZOLINONE AND METHYLISOTHIAZOLINONE. May produce an allergic reaction.

SAFETY INSTRUCTIONS

PROTECTION DURING USE	STORAGE AND DISPOSAL
• Keep out of reach of children • If medical advice is needed, have product container or label at hand • Do not breathe spray • Use only outdoors or in a well-ventilated area	• KEEP PRODUCT AWAY FROM CHILDREN AND PETS • KEEP PRODUCT IN ORIGINAL CONTAINER, tightly closed in a safe place • KEEP AWAY FROM FOOD, DRINK AND ANIMAL FEEDING STUFFS • Dispose of contents/container to a household waste recycling centre as hazardous waste except for empty tripled rinsed containers which can be disposed of by recycling or in the dustbin. Contact your local council for details (UK only) • Collect spillage • Do not empty into drains • PROTECT FROM FROST

Contains 0.08 g/l flupyradifurone as a AL formulation type (Ready-To-Use)

INSTRUCTIONS FOR USE

Controls Aphids (Greenfly, Blackfly), Leaf hoppers, Scale insects and moderate control of Whitefly.

WHERE TO USE	PESTS	MAX. APPLICATION PER YEAR	MIN. INTERVAL BETWEEN SPRAYS	LATEST TIME OF APPLICATION BEFORE HARVEST
House plants and ornamentals garden plants (indoor)	Aphids Whitefly Scale insects	2	7 days	N/A
Ornamental garden plants (outdoor)	Aphids Leaf-hopper	2	7 days	N/A
Tomato, pepper and chilli, cucumber, aubergine, courgette and summer squash (indoor and glasshouse)	Aphids	2	10 days	3 days
Apple (outdoor)	Aphids	1	N/A	14 days

HOW TO USE

SHAKE WELL BEFORE USE

1. Press down the small tab on top of the nozzle firmly, where indicated.
2. At the same time, twist the nozzle to the "ON" position by turning 1/4 of a turn in either direction.
3. Spray thoroughly to wet upper and lower surfaces of the leaves & stems to ensure a visible even coverage, but not to run off.
4. After use, twist the nozzle back to the start position, ensuring the tab has reset to the locked position.

Controls Aphids (Greenfly, Blackfly), Leaf hoppers, Scale insects and moderate control of Whitefly.

INSTRUCTIONS FOR USE

WHEN TO USE

Spray at first signs of infestation (for apples, not before flowering), make a second application when conditions favour prolonged infestation. Second application should not be made within 7-10 days after the first application.

For apples only apply a single application. Refer to table for details of maximum number
of sprays, minimum interval between treatments and number of days to leave between spraying and harvesting the crop.
For best results, only use on plants which are actively growing.
Aphids stop feeding after 1 – 2 hours and efficacy is visible after 1 day.
The best time to spray is early morning or evening.
Do not spray in bright sunlight or when plants are dry at the roots.
This product may stain soft furnishings or other absorbent surfaces.
Control of aphids in mature apple trees may not be achieved.
Ensure spray is directed away from any surface water.
Do not treat sensitive varieties with delicate foliage. It is recommended to test a small number of plants to confirm plant safety. Where significant damage is seen to plants, the possibility of effects on saved seed cannot be excluded.
