LQ Solutions is a brand of Pdotwolf Ltd

VerritexPro is a specialist, acid free, environmentally sensitive solution developed for the safe and efficient cleaning of all glass surfaces. Ideal for large areas of inaccessible glass such as professional greenhouses, amenity buildings and high rise buildings. Suitable for both outside and inside surfaces.

- **VerritexPro** ensures maximum "sparkle" and "light transmission" with the minimum of effort.
- **VerritexPro** has a real safe advantage because it does not contain any hydrogen fluoride gases that have a harmful vapour effect. Therefore making it safe to use in confined spaces like in greenhouses.
- **VerritexPro** - A unique, environmentally sensitive glass cleaning solution that easily removes algae, dirt, soot, sticky sap, grease, soils, pesticide and chemical residues from glass surfaces. It will also penetrate crevices.
- **VerritexPro** Will not roughen or etch the glass, unlike acid cleaners.
- **VerritexPro** is both solvent and caustic free. Ideal for both inside and outside as it does not give off fumes or odours. With a PH of 9.8 **VerritexPro** will not damage sensitive surfaces such as glazing bars, aluminium or magnesium alloys.
- **VerritexPro** is compatible with high and low pressure washers.

DILUTION RATES

Mechanised Application

- **For best results apply by pressure washer/jetter, pressure sprayer/knapsack sprayer.**
- **Dilute 1 part VerritexPro to 20 parts water.**
- Using a sprayer will make the solution foam. This gives a good indication as to what areas have been treated.

Hand Application

- **Dilute 1 part VerritexPro to 10 parts water.**
- Apply using cloth, brush, mop or hand sprayer.

DIRECTION FOR USE

For best results do not let **VerritexPro** dry onto the surface. It will not damage the surface but will leave a residual film which is hard to remove.

- Ideally apply **VerritexPro** on a slightly breezy day letting the wind dry the glass which will improve the drying process.
- VerritexPro can be mixed with hot or cold water.
- Do not apply **VerritexPro** when the temperature is less than 5 degrees C
- Leave **VerritexPro** for 5 minutes allowing the product to activate and loosen the surface soiling. Then thoroughly rinse off with a power/jet wash.
- If using a hosepipe to rinse off you will need to agitate the surface soiling with a cloth or stiff brush before rinsing.
- With exceptional heavy soiling it might be necessary after applying **VerritexPro** to agitate the surface soiling with a cloth or stiff brush before rinsing.
- Make sure the surface is rinsed THOROUGHLY.
- DO NOT allow concentrated **VerritexPro** to be drained into surface water courses. Diluted **VerritexPro** is safe to be drained into surface water courses.

VERRITEXPRO A GLASS CLEANING SOLUTION CONTAINING SODIUM DIMETHYL BENZENE SULFONATE.

PRECAUTIONARY PHRASES APPLY TO CONCENTRATE LIQUID.

- IRRITATING TO EYES
- IN CASE OF CONTACT WITH EYES, RINSE IMMEDIATELY WITH PLENTY OF WATER. SEEK MEDICAL ADVICE IS IRRITATION PERSISTS.
