WILTPRUF S600

The anti-transpirant spray for use on trees, roses, shrubs, bedding plants, cuttings, pot plants, cut foliage and Christmas trees.

DIRECTIONS FOR USE
WILTPRUF S600 is a biodegradable coating material for the treatment of all plants to reduce wilting and shock when transplanting. WILTPRUF S600 may also be used to protect plants that grow in adverse weather conditions, eg exposed positions, coastal plantings and polluted areas. It may be applied as a dip or used as a spray according to the size of plants and conditions. Apply spray to all parts of the plant paying particular attention to the undersides of the leaf. Spray to run-off and allow to dry before handling. This will take several hours but may take longer in conditions of higher humidity and low temperature. Do not apply in temperatures below 7°C (47°F). Apply using a pressure sprayer as a fine spray covering upper and lower leaf surfaces. Apply at 8-10 week intervals until plants have become established.

APPLICATION RATES
For Protection During the Transplanting of Trees, Shrubs and Conifers.
Spray one part WILTPRUF S600 to ten parts water at least two hours before lifting. Apply spray to all surfaces to the point of run-off, or spray all surfaces as soon as possible after planting.
For Winter Protection
Use one part WILTPRUF S600 to ten parts water, sprayed on all surfaces to protect plants against winter drought, cutting winds and salt spray.
Christmas Trees
Spray with one part WILTPRUF S600 to ten parts water to dry foliage, to help retain the colour of the trees and prevent needle drop. If the trees are to be kept in high temperatures, spray once, allow to dry and spray again.

MIXING INSTRUCTIONS
SHAKE WELL BEFORE USE Fill the sprayer with half the quantity of water required, add the WILTPRUF S600, make up to the required volume with more water and agitate thoroughly.
If the contents of the sprayer are not used immediately, the mixture should be thoroughly agitated before spraying.

WILTPRUF S600 contains 23% w/w di-1-p-menthene
WARNING
Causes skin irritation - May cause an allergic skin reaction - Toxic to aquatic life with long-lasting effects - Avoid breathing spray - Wear protective gloves - IF ON SKIN: Wash with plenty of soap and water - If skin irritation or rash occurs: Get medical advice/attention - Take off contaminated clothing and wash before reuse - Collect spillage - Dispose of contents/container as hazardous waste

Conditions Of Supply
All goods supplied by us are of high quality and we believe them to be suitable, but as we cannot exercise control over their storage, handling, mixing at use or of the weather conditions before during and after applications which may affect the performance of the goods, all conditions and warranties, statutory or otherwise as to the quality or fitness for any purpose of our goods are excluded and no responsibility will be accepted by us or re- sellers for any failure in performance, damage or injury whatsoever arising from their storage, handling application at use. These conditions cannot be varied by our staff or agents whether or not they supervise or assist in the use of such goods.
