

Stockbridge Independent Trial

A trial using **DCM Plant Based Feed** was conducted on tomato plants, all three plants were grown in a retail peat-free growing media.

The plant on the left received no DCM Plant Based Feed, the plant in the middle was fed with 3g/L of DCM, and the plant on the right was fed with 7g/L of DCM.

As shown in the image above, the plants grown with **DCM Plant Based Feed** incorporated into the growing media had greater growth and more foliage compared to the plant that received no feed. The tomato plant fed with 7g/L of DCM Plant Based Feed had the largest amount of growth observed.

DCM Plant Based Feed

Certified for organic use.

Perfect for:

- Flower beds & borders
- Vegetable gardens
- Container and basket plants
- Lawns
