

Perforated Stretch Films

Introducing our new range of Perforated Trolley and Pallet stretch films.

Handwrap

- Adhesive only on the inside of the film but extremely slippery (non adhesive) preventing wrapped trolleys or pallets sticking together.
- Holes are sized to prevent foliage from protruding through the film during transport but in sufficient quantity to ensure adequate ventilation for the plants
- Core length is 500mm to allow use of hand held applicator
- Strengthened edges to prevent ripping and facilitate locating the start of the film once more.
- Material Polyethylene (LLDPE) 100% recyclable
- Lightweight and durable.

F/CODE	WIDTH MM	LENGTH M	THICKNESS MICRON	UNIT	£ EACH

Machine Films

Macroauto Aerextra 5 Perforated films

- Material Polyethylene (LLDPE) 100% recyclable
- Adhesive only on the inside of the film
- Reinforced macroperforated stretch film for semi automatic or automatic wrapping machines with medium or high pre-stretching
- Their extreme resistance, makes these films really suitable for wrapping and stabilizing all types of loads, thanks also to its high stretching memory (aver 30%) and tearing resistance.
- Pre cut vertical slits will result in rectangular shaped perforated holes once stretched to 200 - 250% depending on fiim and machine settings

F/CODE	WIDTH MM	LENGTH M	THICKNESS MICRON	PRE-TILL-STRETCH %	£ EACH
GPMCPF200	470	1550	12	200	86.32
GPMCPF250	470	1100	15	250	84.02

Macroauto N/8 Perforated Film

- All the features of the Aerextra perforated film but with higher quantity of smaller circular shaped perforations

F/CODE	WIDTH MM	LENGTH M	THICKNESS MICRON	PRE-TILL-STRETCH %	£ EACH
GPMCPFN8	470	1450	12	180	86.32
