

The Dramm Autofog is the ultimate in fogging machines that sprays an ultra-fine cloud of droplets penetrating deep into the plant canopy covering all surfaces, ensuring excellent control of greenhouse pests and diseases.

DRAMM

The Dramm Autofog sprays automatically with no operator present, eliminating labour whilst reducing the amount of chemical needed.

The tanks conical centrepiece design prevents chemical accumulation in the centre of the tank whilst agitation is taking place providing a homogeneous solution.

All components of the Autofog are made from corrosion resistant material ensuring a long, reliable life. Clean up is easy and maintenance is simple.

- Treats up to 2800m² (Up to 6500m² with additional fans)
- Large 14lt formulation tank with agitation system.
- 2 programmable timers (agiator and operation) allowing for auto start and stop.
- Fogger head separates from control & compressor carriage for portable use.
- Stainless steel nozzle for use in corrosive situations.

LVH 20A

NOZZLE TYPE	Air Atomising	COMPRESSOR HP	1 hp
STD CONTROL SYSTEM	2-24hr quartz timers	COMPRESSOR TYPE	Oiless, Capacitor Start, Brushless Motor
POWER	240v, 50-60hz single phase	COMPRESSOR OUTPUT	4.06 CFM @ 28.5 PSI
CHEMICAL TANK	14lt	HOSE & CABLE LENGTH	30.50m
CHEMICAL OUTPUT RATE	55cc/min	DIMENSIONS WIDTH	463.55mm
RATED LOAD	8 amp	SHIPPING WEIGHT	84.82kg
