UK FERTILISER Declaration

Boric acid fertiliser in solution	
Boron (B), water soluble	2.0%

Liquid in solution.
pH= 6.8 ± 1.0.

Other components:
The product also contains nitrogen (N): 0.7%.

INSTRUCTIONS AND DOSE APPLICATION:

PhytoPrime D is designed to have optimal assimilation through both leaves and roots in all crops.

Foliar application: 0.15-0.5% (150-500 ml/hL or 1.5-5 ml/L).
Root drench: 2-3 L/ha.

To be used only where there is recognised need. Do not exceed the appropriate application rates. Farmers are encouraged to avoid nutrient losses and to take into account official recommendations when preparing fertilisation plans.

COMPATIBILITY:
Please contact the company or the company's distributor for more specific recommendations. www.veganic.bio
