

THE RIGHT SHADING FOR STRAWBERRIES

EXAMPLE STRAWBERRY GREENHOUSE

Location **United Kingdom**
Vegetable crop **Strawberry**
Greenhouse material **Plastic**

STRAWBERRIES NEED

Indirect sunlight, maximum temperature as low as possible.

ADVICE: 10 BUCKETS REDUSOL/HA

ReduSol is a coating that reflects the sun's energy to a high degree. It is wear-resistant and can be easily removed with ReduClean. For many years ReduSol has been the best choice when it comes to protecting plants from too much heat and light.

- Choose the shade percentage you want
- Wear resistant over a long period of time
- High light transmission during rain
- Suitable for foil greenhouses and tunnels
- Easy to remove with ReduClean

WHY USE REDUSOL?

- The strawberries remain durable, fewer bruises during harvesting and thus less production loss
- Strawberries stay good longer, immediate harvest often not necessary
- More stable growth, better ripening and taste

ReduSystems®

ADVICE: 20 BUCKETS REDUFUSE IR/HA

ReduFuse IR is a coating that keeps some of the heat radiation out and at the same time distributes the light as it enters the greenhouse. This stimulates growth and production and reduces stress in the plant.

- Lower temperature in the greenhouse or tunnel
- Optimal light distribution in the greenhouse or tunnel
- Lower temperature of plant and fruit
- Less stress for the plant
- Suitable for foil greenhouses and tunnels
- Easy to remove with ReduClean

WHY USE REDUFUSE IR?

All the advantages of ReduSol for strawberries, but with more diffuse grow light (PAR) in the greenhouse.

ADVANTAGES OF COATINGS VS. SHADING NETS:

	Coatings	Shading nets
Transparency when wet on dark rainy days	Up to 30 % more transparent with ReduSol, up to 3% more transparent with ReduFuse IR	Remains just as dark
How it works	Reflect the heat	Partially absorb the heat and thus heat up the greenhouse roof
Flexibility	Can be optimised depending on season, culture. Department can be optimised	A fixed decision for many years
Multi-year use	New and optimal every year	Shrink and get dirty
Attachment and removing	Easy	Labour-intensive
Influence on the foils	Extend their service life	Cause wear

ReduSystems® is the global leading brand in developing coatings and cleaners for greenhouse cultivation. The products control the incidence of natural light and heat to optimise the climate for the crop in every season - from a cooler climate in summer and more light in winter, to diffuse light and changing the light spectrum.

ReduSystems is a brand of Lumiforte®
