

Jiffy Bark Cover Mix

Protects all container-grown plants

- Will not blow away or fall from container
- Free from peat & plastics
- Organic & biodegradable
- Quick drying

Jiffy Cover Mix mulch keeps containers weed and moss-free, season after season. Suitable for all nursery stock and other container-grown plants, it can be used both indoors and out.

Unlike many mulches, **it won't blow away or fall off**, even if the container falls over, making it practically weather-proof. **There's no mess or waste, saving time, labour, and money.**

Applying a layer of 1 - 3 cm to containers will form a protective cover over the substrate. Its quick drying action ensures moss and weeds don't get the chance to sprout. At the same time, it slows water evaporation from the substrate, keeping it moist for longer.
