

PURPOSE-BUILT FOR NEMATODES

Enclosed pump
Easy to carry

5 gallon capacity

Aeration switch
Agitate or aerate

AC or DC
Flexible options

Introducing the nematode aeration system

Purpose-built for nematodes

- Specifically designed to meet the needs of nematode treatment and aeration

Innovative design

- Small recirculation pump with a Mazzei injector
- Air valve system for efficient oxygen injection

Superior aeration

- Maintains high levels of dissolved oxygen without significant temperature increase
- Prevents dead spots and ensures thorough mixing of nematodes

Safe and versatile:

- All units operate at 12v to ensure safety

Efficient operation

- Minimal structure prevents nematode hiding spots
- Easy to use with simple flip air valve switch

Specifications

F/CODE	DRAGB
CAPACITY GALLON	5
FLOW RATE GPM	0.7
VOLUME L	1.5
