PEAT-FREE

Grow Naturally with DCM Fertilisers

Trusted by Professionals | Backed by Trials | Perfect for Home Gardeners

Why Choose DCM?

DCM Fertilisers have been trusted by commercial growers across the UK for years, delivering exceptional results in challenging conditions. Backed by extensive trial work, these fertilisers have proven their ability to promote healthy growth, particularly for plants in peat-free substrates. Now available in convenient 1kg bags, DCM brings professional-grade results to home gardeners.

Key benefits for home gardeners

- **Suitable for organic growing:** Made from premium materials, safe for plants, people, and the planet.
- **Proven commercial success:** Trusted by professional growers nationwide to deliver consistent results, even in demanding peat-free conditions.
- **Trial-backed performance:** Comprehensive trials confirm superior plant health, uniform growth, and enhanced yields.
- **Controlled nutrient release:** MINIGRAN® technology provides steady feeding over time, ensuring optimal plant growth.
- **Easy and efficient application:** Uniform mini-granules ensure even nutrient distribution with minimal effort.

Perfect for:

- Flower beds and borders
- Vegetable gardens
- Container and basket plants
- Lawns and Turf

Proven in the field

DCM fertilisers have delivered outstanding results for commercial growers across the UK, overcoming challenges in peat-free substrates and improving yields. Trial work confirms these benefits, ensuring home gardeners can achieve professional-grade success.

Grow with confidence

DCM Fertilisers combine research, innovation, and proven performance to support gardeners in growing naturally and sustainably.

Bring DCM to your Garden Centre Retail Store

DCM Fertilisers offer a compelling opportunity to inspire confidence and success in your customers' gardening journeys.

Why Stock DCM Fertilisers?

Promoting excellence in horticulture

By offering DCM Fertilisers, your garden centre can showcase its commitment to helping customers achieve gardening success. Trusted by professionals and backed by trial work, DCM delivers remarkable results for both novice and experienced gardeners.

Supporting sustainability goals

DCM's composition and proven effectiveness in peat-free substrates align perfectly with the growing demand for eco-friendly gardening solutions. Suitable for organic growing, stocking DCM demonstrates your commitment to promoting sustainable and environmentally responsible practices.

Meeting customer demand

As more gardeners seek sustainable, high-performing products, DCM Fertilisers fill a vital gap in the market. Offering DCM empowers your customers with the tools they need for thriving plants, ensuring they return to your store for trusted solutions.

Enhancing your retail range

Adding DCM to your product line up elevates your reputation for providing premium, research-backed gardening solutions. With its professional-grade quality now available in a convenient 1kg bag, DCM appeals to a wide range of home gardeners looking for dependable results.
