Perfect line marking

When you think of sports like football and rugby, you picture players, coaches, referees, and fans. But without precise line markings, matches couldn't take place. Accurate measurements are essential for a well-prepared playing field. Properly marked lines ensure fair play conditions and comply with official regulations. Marking errors can lead to confusion, uneven gameplay, and even field re-evaluation.

Moreover, precise line marking enhances the professional appearance of the field and improves overall play quality.

By using high-quality line marking products and the right equipment, you save time and prevent inaccuracies. A well-marked field is the foundation of every game, yet behind the scenes, groundskeepers invest time, effort, and expertise to keep pitches in top condition.

Groundsman's challenges

Marking sports fields may seem straightforward, but in reality, several challenges arise:

- ✓ **Unpredictable weather** can affect paint adhesion and drying time, making it frustrating when lines fade or disappear after rain.
- ✓ **Achieving precision** in line marking requires skill—small mistakes can disrupt the look and accuracy of a field.
- ✓ **Time-consuming processes** make frequent overmarking necessary, especially for high-usage fields, increasing both labor and costs.
- ✓ **Inconsistent line quality** caused by surface variations or outdated equipment impacts gameplay and field aesthetics.
- ✓ **Environmental concerns** push for sustainable solutions that reduce chemical impact and plastic waste.

Selectline: smarter, sustainable, and efficient line marking

At Selectline, part of Lumiforte, we understand these challenges and offer high-quality, innovative solutions that help you save time, reduce costs, and achieve perfect results.

With over 30 years of experience in sports field marking, we place sustainability and respect for people and nature at the heart of everything we do.

Our complete range of durable line marking paints can be tailored to specific needs and are suitable for all weather conditions. Combined with our precision-engineered line marking machines and accessories, we help you work more efficiently, save time, and ensure the accuracy needed for perfect lines—no matter the conditions.

Whether you need ready-to-use or mixable paints, automated line marking machines, or eco-friendly solutions, Selectline is your trusted partner for reliable, high-quality field marking.

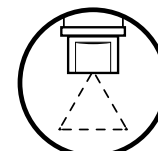

“Precision, sustainability, and efficiency
— marking the future of sports fields”

Joost Anthonissen - Product manager Line Marking

SELECTLINE CONCENTRATE PAINTS

- ✔ Perfectly tailored to your needs!
- ✔ Concentrated: mix with water
- ✔ Environmentally friendly
- ✔ Economical in use

linemarking paints!

A great combi!

Selectline Mix is a line of concentrate mixed paints that are characterized by their whiteness, stability in the can and are safe for the environment. This range of line marking paint is suitable for all sports that are played on natural grass.

Application

All Selectline concentrate paints can be applied with a suitable line marking machine equipped with a pump with 3 bar – 45 PSI capacity (for example a Selectliner or Easyliner). The application is also possible with a transfer wheel machine like the Roll Liner (10cm).

Selectline concentrate paints need to be diluted with water and can be used directly on the field. Shake the can thoroughly before use. Create the desired amount of solution by mixing Selectline Mix paint in a advised ratio of 1:4 with clean water.

“Effortlessly versatile – our concentrate paints work seamlessly the Selectliner, Easyliner and most standard line marking machines with a flat tip nozzle.”

Peter Crielaard
International account manager

PAINT	WHITENESS	WEAR RESISTANCE	PRICE	MIXING RATE	AVAILABLE COLORS	NOZZLE TYPE
Selectline Mix Prof			€€€	Initial marking: 1L + 4L water Overmarking: Up to 1 : 12		Flat-tip Yellow: 0,92 liter per minute

A perfect match!

The Selectline Ready to use paints are known for their quality and ease of use. They help grounds men save time. It is not necessary to dilute this line marking paint with water, therefore it's perfectly suitable for all sports played on natural grass.

Application

All Selectline Ready-to-use paints can be applied with the Selectliner and Easyliner or most common standard line marking machines equipped with a pump with 3 bar – 45 PSI capacity.

Selectline Ready-to-use paints does not need to be diluted and can be used directly on the field. Install the can in a suitable line marking machine or pour the solution in the tank. Use the right nozzle to get your desired result.

"With the Selectliner, precision meets perfection – customized for your needs, built for reliability, and designed to deliver flawless results every time."

Dimitri Daeseleire
International account manager

BESTSELLER

PAINT	WHITENESS	WEAR RESISTANCE	PRICE	CONSUMPTION PER FOOTBALL FIELD*	AVAILABLE COLORS	NOZZLE TYPE
Selectline Ready Fit			€€€	3 - 4L		Hollow-cone Red: 0,14 liter per minute White: 0,22 liter per minute Purple: 0,35 liter per minute
Selectline Ready Go			€€	3 - 4L		Hollow-cone Red: 0,14 liter per minute White: 0,22 liter per minute Purple: 0,35 liter per minute
Selectline Direct			€	10L		Flat-tip Yellow: 0,92 liter per minute

* The consumption rate is based on the use of a Selectline machine and depends on the type of nozzle and operator's walking speed during application.

Machinery

Line marking machines are essential for achieving precise, consistent, and professional results in line marking. They ensure uniform application of paint, which is crucial for creating clear and accurate lines, whether for sports fields, parking lots, or safety markings.

These machines significantly reduce the time and effort required compared to manual methods, offering efficiency and reliability. With the right line marking machine, you can achieve perfect lines every time, even in challenging conditions. Their precision also helps to reduce paint waste, making them an economical choice for both small and large- scale projects.

Our line marking machines

SELECTLINER

Professional line marking machine, extremely reliable due to the use of high-quality materials. This ensures the durability and performance for many years. User-friendly because of its many features;

- ✓ Strong and stable chassis
- ✓ Spray from side or front
- ✓ Adjustable line width (5 -12 cm)
- ✓ Equipped with battery and pump for optimal results
- ✓ Suitable for two cans (10L)

AUTONOMOUS GPS LINE MARKING ROBOTS

The TinyLineMarker Sport and TinyLineMarker Pro X make sure you save up time for grounds men. It consists of 50+ field types which can be scaled and modified. This makes sure you'll get fast, accurate and repeatable line markings every time, regardless of the weather.

Get fast, accurate, and repeatable line markings every time—contact us to learn more about our autonomous GPS line marking robots!

TinyLineMarker Pro X

EASYLINER

This compact line marking machine is the little brother of the Selectliner. Equipped with the same battery and pump as the Selectliner. Popular because of its sharp price, ideal for small sports clubs.

- ✓ Easy to use
- ✓ Adjustable line width (5 -12 cm)
- ✓ Suitable for one can (10L)

ROLL LINER

Transfer wheel line marker for full control of your lines. The machine is equipped with a 10L reservoir. Loved by professional clubs for their pitches.

- ✓ Available in 10 cm and 12 cm
- ✓ Adjustable handlebar
- ✓ Easy to clean
- ✓ Easy to use

Accessories

Optimize your line marking with essential tools

Ensure straight, accurate lines effortlessly with field markers and rope systems. Keep your equipment in top condition with Selectline Cleaner, preventing clogs and extending lifespan. Use the stirrer for optimal paint preparation. Achieve precision, efficiency, and long-term performance in every marking project.

FIELD MARKERS

Field markers are a useful tool for the (re-)marking of your field. They are flexible and easy to apply (or remove) in the ground at the spots you want to mark. This can save you valuable time the next time you mark the lines. Packed per 25 pieces and available in:

- ✓ Blue
- ✓ White
- ✓ Red
- ✓ Orange
- ✓ Yellow

ROPE SYSTEM

This rope system is a fast and easy helping tool when marking your field(s). With this set, you have all the necessary at your hand to get perfect straight lines.

- ✓ Fast and easy
- ✓ Perfect straight lines

SELECTLINE CLEANER 5L

The Selectline cleaner is a cleaner for your line marking machine for quick and effective cleaning. Easy to apply and prolongs the lifetime of your line marking machines.

- ✓ Shorter cleaning time
- ✓ Prolongs the lifetime of your line marking machine.
- ✓ Easy to apply
- ✓ Economical in use

STIRRER

For an optimal lining product, this metal stirrer can be used to shake your product or diluting with water.

Easy to use in combination with a battery-powered drill for a minimal effort.

Cost-effective

Think per field, not per liter! When marking your field, what matters most is how far your paint goes. That's why it's smarter to focus on the cost per field rather than the price per liter.

The smart way to calculate your costs

With our efficient, low-consumption paints, you'll cover more ground with less product – saving you time, effort, and money. It's the perfect way to achieve high-quality results while keeping costs under control.

Understanding your true costs is easy with this simple formula:

This method shows exactly how much it costs to mark a field, helping you make smarter, more cost-effective choices. It's not about how much paint you buy—it's about how far it goes!

Start calculating your cost per field!

Price per liter × Liter per field = Price per field

_____	×	_____	=	_____
_____	×	_____	=	_____
